

## EXCEL2AMI FREE SETUP INSTRUCTIONS

1. Download Excel2Ami Free Setup from [www.aamaadmisoftware.com](http://www.aamaadmisoftware.com). You will get a file named Excel2AMIFree\_Setup.rar.
2. Unzip this file in a folder. You will get a file named Excel2AMIFree\_Setup.exe.
3. If you are using Windows 7 then right click on the Excel2AMIFree\_Setup.exe and then select Run as administrator. For windows XP simply double click to run it.
4. You will see below screen. Click next to install it completely.

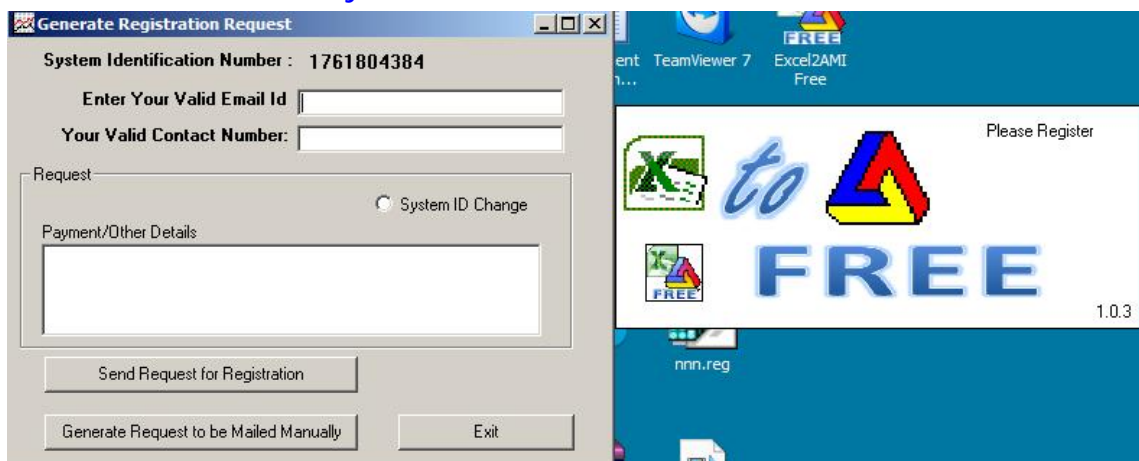

5. It will prompt for installation of 7Zip. You need to install that also.

6. When you run Excel2ami Free then it will ask for registration.

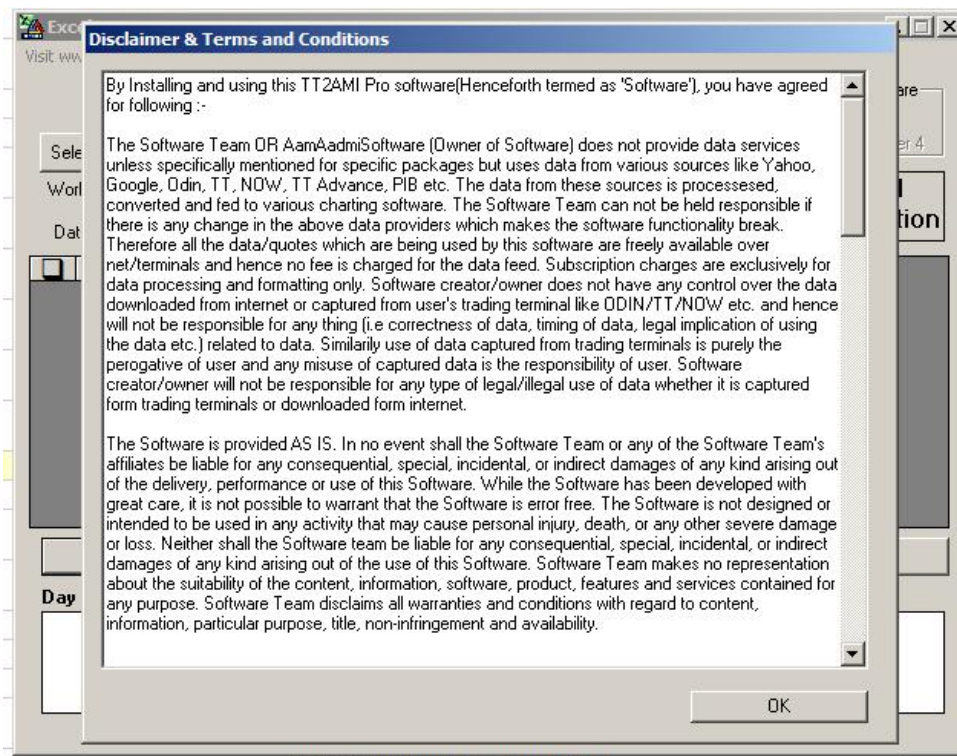

7. Click on OK and it will open a Registration Panel. Fill in your Email Id and Contact no. and Send registration Request. IF you want to send registration request manually then u can click on second button and send the file mentioned by software to us as attachment.

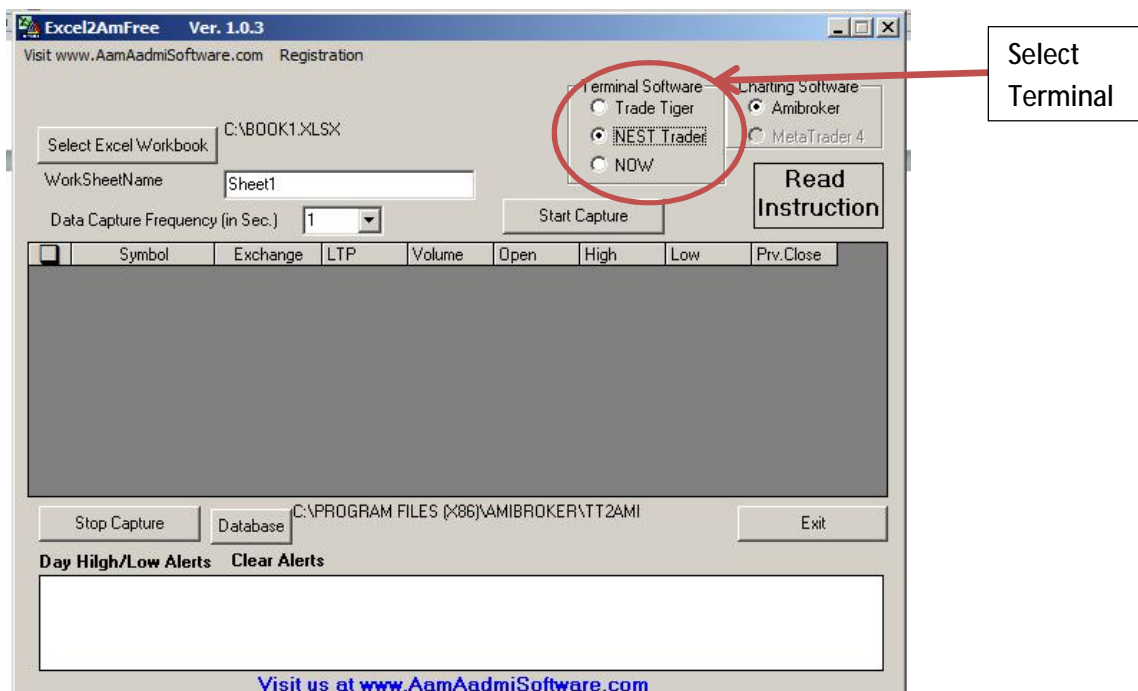

8. Once your software is registered, you can run the software. Normally it is activated within 24 hrs. If it is not activated then you can mail us.

9. When you run software you will see disclaimer. Click on OK to accept it.

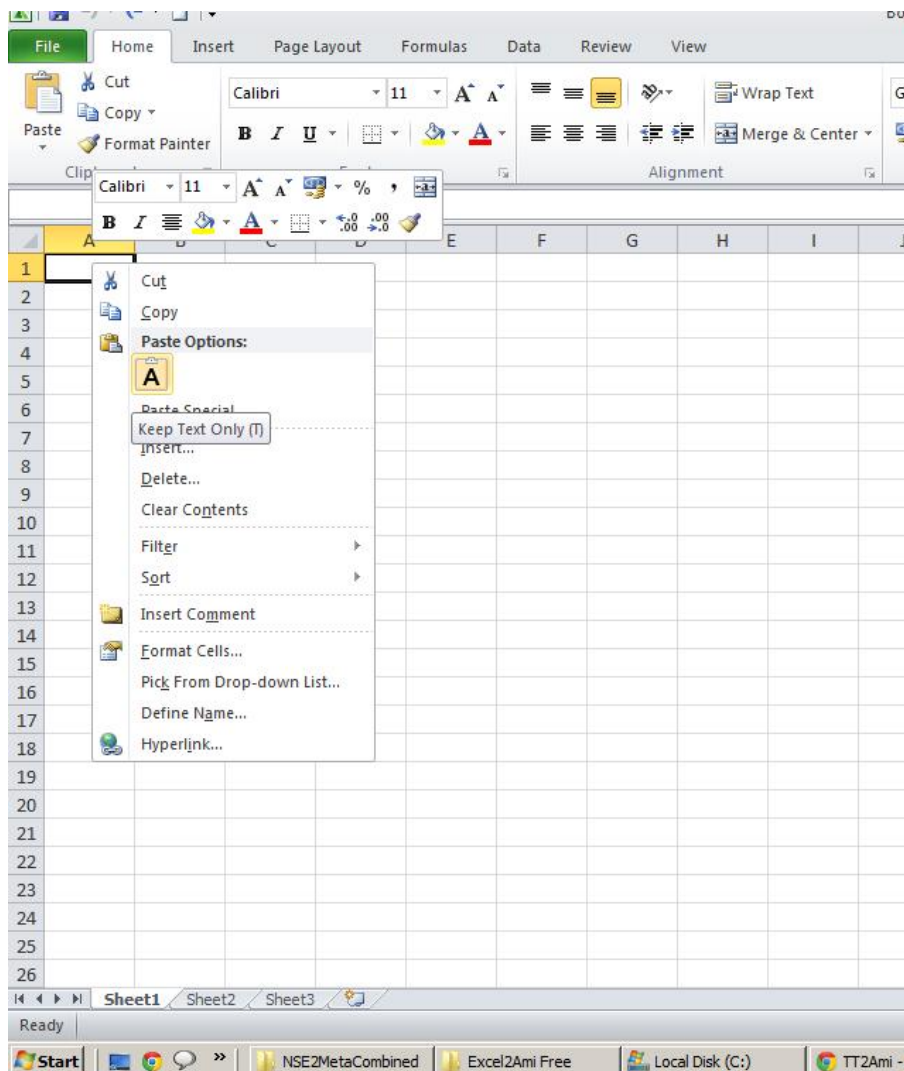

10. After accepting disclaimer, you will see screen as shown below:

11. We will explain process to fetch data from Nest Terminal to Excel sheet. Run NEST Trader and right click on the market watch. Select Link to Excel and All Items.

15. Similarly you need to set the format of LTT column to Time as HH:MM:SS as shown below:

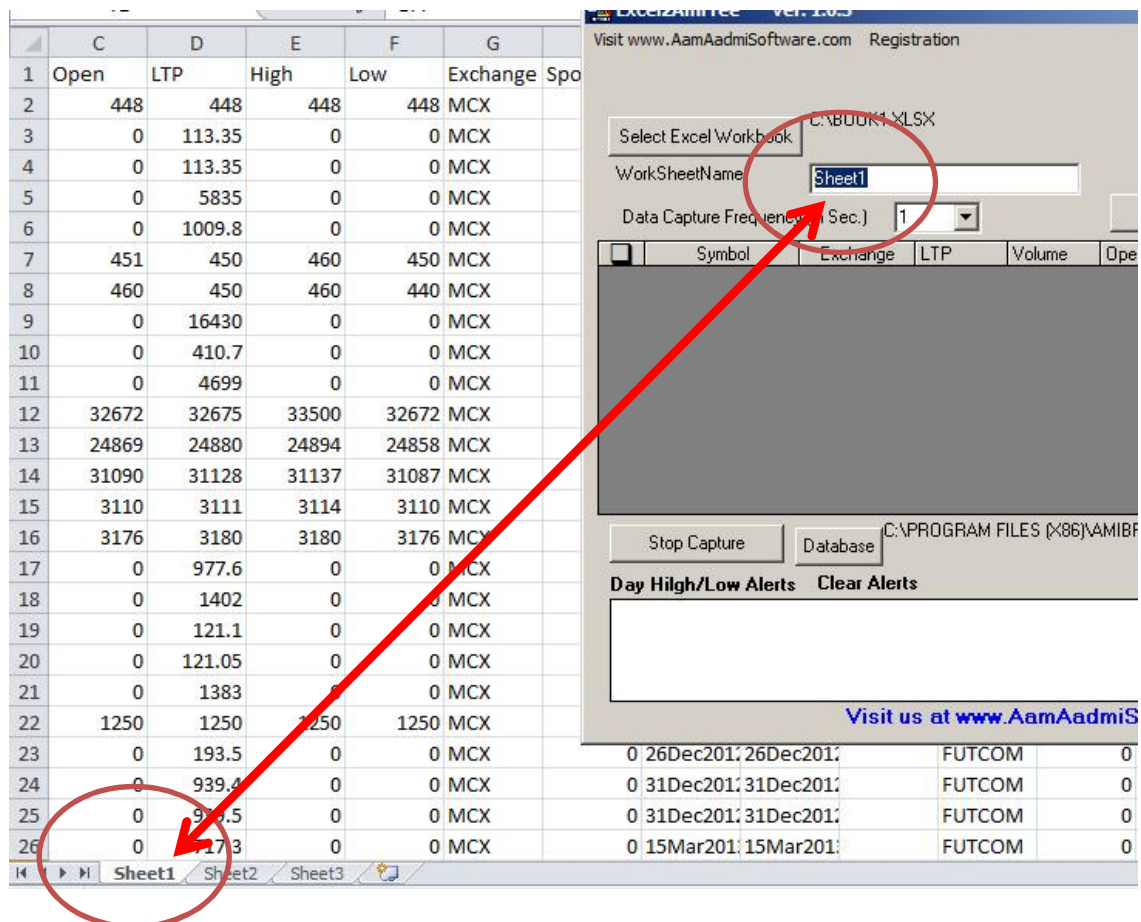

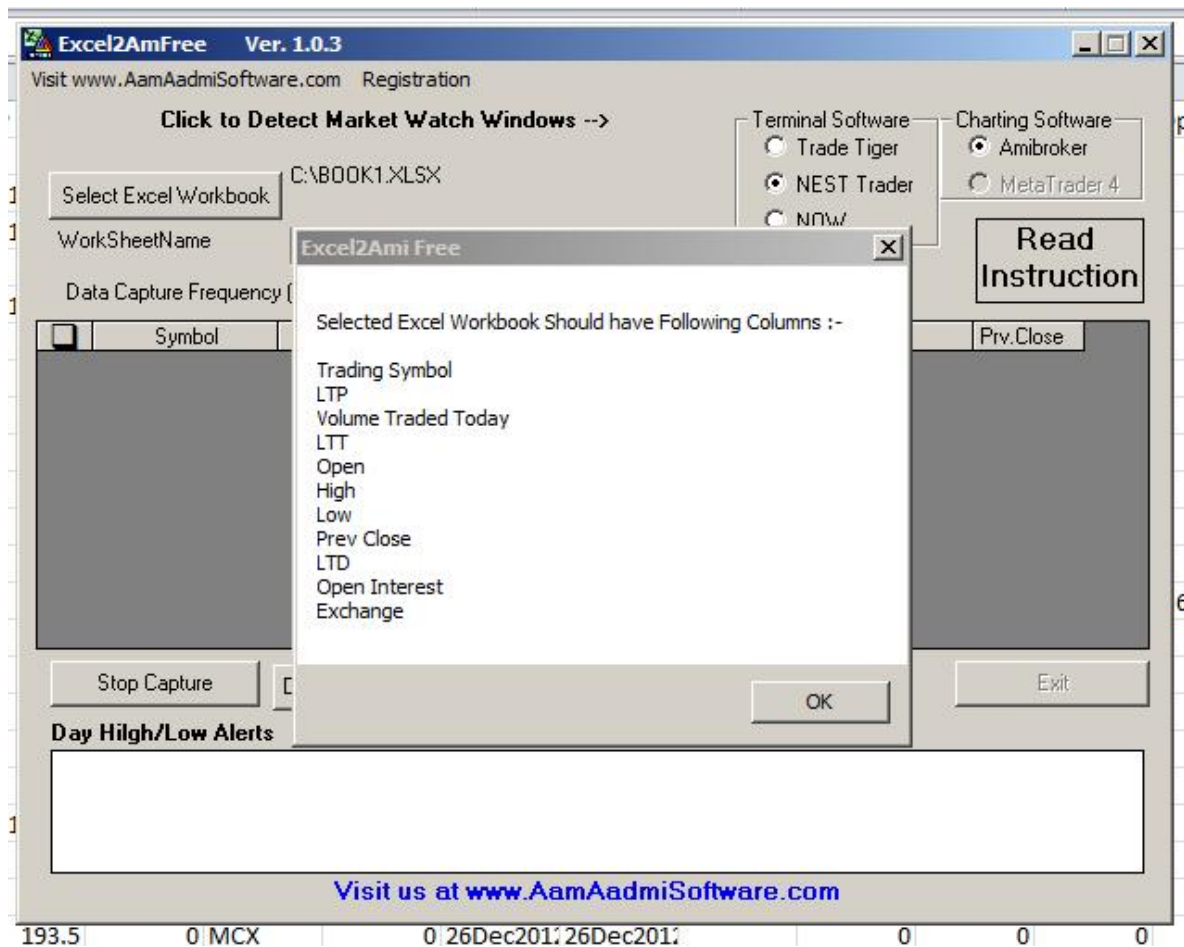

16. Save this Excel file as C:\Book1.xlsx. You can save it with any name and any location. You need to select the same file in Excel2Ami Free by Clicking Select Excel Workbook as shown below:

17. Make sure that name of the worksheet is same as mentioned in excel workbook. It is case sensitive. So be careful:

18. Now you are ready to capture data from excel sheet. Click on Start Capture. If essentials columns are missing in your market watch of your terminal then you will see message like this:

19. Add all these columns mentioned in the message in market watch of your terminal. After adding all required column you need to repeat all steps to link the excel sheet to terminal i.e steps 11 to 16.

20. After adding all the required columns click on OK on the message displayed. You should see rates in Excel2Ami software.

21. Excel2Ami will open the Amibroker automatically and load the database. You may not see any charts because it needs at three bars to display the chart. You can see all the symbols. Symbols names are taken from trading symbol columns. You can change the symbol as per your requirement in this column. Say you can write SILVERMIC-1 in place of SILVERMIC13FEBFUT in trading symbol column. Then Excel2Ami will create symbol by name of SILVERMIC-1.

22.This is all what is required to get data from Excel to Amibroker.

23.If you get any message like OCX is missing or not registered, locate click2reg.bat in Excel2Ami installation folder and double click to run it.

Enjoy the Trading...
