

## Instructions for SQA/Nest2Ami Pro/Odin2Ami Pro

1. Set User Control as Minimum. To do that goto

Control Panel -> User Account and Family Safety -> User Accounts -> Change User Account Control Setting.

Slide the slider to the minimum value.

2. Download the setup file from our website. Unrar/Unzip it in any folder and run the extracted setup file as administrator.
3. Run the software after installation as administrator. To set it permanently run as administrator, right click on the My Software icon, goto properties -> Compatibility and tick the "Run as Administrator".
4. **If still program does not run and close after giving error, Delete wininet.dll and urlmon.dll files from software installation folder.**
5. Software should run fine after this. If it does not start then contact software provider.
